

# English Composition Practice - September 2024

---

This document contains today's English composition practice, including the user's original translations, scores, corrections, explanations, and model answers with detailed analysis.

## Translation 1

### Original Japanese:

デジタル技術の進化により、教育の方法が大きく変わり、特にリモート学習が普及しています。

### User's Translation:

The way of education has changed significantly due to the advancement of digital technology, and on top of that, remote learning has become common.

**Score: 8.0/10**

### Corrections and Explanation:

- 'The way of education' → 'The methods of education': 'The methods of education' is a more natural expression in English.
- 'Due to the advancement of digital technology' → 'Due to advancements in digital technology': Using 'advancements' is more fitting in this context and reflects ongoing progress.
- 'On top of that' → Removed: 'On top of that' is redundant here and can be omitted for a cleaner sentence.
- 'Has become common' → 'Has become increasingly widespread': 'Increasingly widespread' is a more formal and appropriate phrase for describing the growing prevalence of remote learning.

### Corrected Version:

The methods of education have changed significantly due to advancements in digital technology, and remote learning has become increasingly widespread.

### Model Answer 1:

Advances in digital technology have significantly transformed the methods of education, with remote learning becoming increasingly prevalent.

**Model Answer 2:**

Digital technology has brought about significant changes in education, especially with the widespread adoption of remote learning.

**Model Answer 3:**

The evolution of digital technology has led to a major shift in education, with remote learning becoming an increasingly common practice.

**Explanation of Model Answers:**

1. 'Advances in digital technology' and 'The evolution of digital technology' effectively express the technological progress. These phrases are formal and appropriate for the context of education.
2. 'Significantly transformed' and 'Brought about significant changes' emphasize the major impact technology has had on education methods.
3. 'Increasingly prevalent' and 'Widespread adoption' are strong expressions for describing the growing acceptance and use of remote learning.
